

Proximity Tag (T1AB) Stand Alone Access Control

The T1AB proximity tag needs only to be moved across the front of the unit to de-activate the lock

No slider to become blocked or need for maintenance.

Easy to use and swift unlocking of your door.

No more standing around outside.

Stand alone access control system

You will find the Benn Proximity access control system is the ideal stand-alone proximity system for many single door commercial and industrial applications. The big advantage is that it restricts access to authorised persons but without the nuisance of stopping outside the door to enter codes. Just wave the tag past the reader and the door is unlocked – simple as that!

- ★ Easy operation
- ★ Up to 97 user tags and PIN codes can be programmed
- ★ A unique identification code for each tag
- ★ Tag-only or tag-plus-PIN code operation
- ★ Advanced Radio Frequency Identification Technology
- ★ Fast and easy installation
- ★ Programmable directly at the keypad
- ★ For indoor or outdoor use; weatherproof
- ★ Outputs for door ajar, tamper, auxiliary, panic and forced door entry
- ★ Request-to-exit input by a push-button or a PIR motion detector
- ★ Non volatile memory, unaffected by power failure
- ★ Separate external reader available

The system, which is based on advanced Radio Frequency Identification technology, contains a built-in high-power relay – no batteries. There is no need for an external reader or a computer. Up to 97 unique tags and their individual access codes can be added or deleted directly at the keypad.

The keypad is for programming and PIN entering only. It cannot be used as a stand alone keypad.
